-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. In view of the Appeal Brief filed on 04/23/2004, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim above, it is not clear what the Applicant means

Claims 1, 8 and 15 recites "the static image on the matrix in a manner which is substantially undetectable to viewers of the display device", 3 last lines.

The specification discloses "slow translation of the image remains unnoticeable to the viewers" at page 9, line 8-9.

Art Unit: 2674

This limitation contains various inconsistencies and / or ambiguities so that the Examiner is unable to understand which one is substantially undetectable to viewers of the display device.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Shen et al (US 6,486,900).

As to claims 1, 8, Shen reviews a display device associated with a method, the display device comprising

In one advantageous embodiment, the screen saver library 220 may provide a screen saver that presents useful information in an unobtrusive video frame. The video frame may present one or more slowly moving images such as graphics that enhance the displayed active image. Alternatively, the video frame may present a non-black background with superimposed auxiliary information, such as, subtitles, program guides, graphics, or the status of other programs. In another embodiment, the screen saver library 220 may provide a screen saver that presents a subdued colored pattern that changes color very slowly in a manner designed to not distract the viewer.

Thus, the teaching of Shen et al meets the claimed limitation that recited in lines 9-12 of claim 1.

As to claims 2-4, 9-11, 16-18, Shen et al teaches any type of display screen may be used. Some types of display screens with which the present invention may be used include projection television display screens, flat panel television screens (field effect display panel), liquid crystal display screens, light emitting diode screens, organic chemical display screens (plasma display panel), and mirror display screens (col. 10, lines 27-32).

As to claims 5-7, 12-14, 19, 20, Shen et al teaches an central image/ active image (a static image, col. 7, line 15).

In one advantageous embodiment, the screen saver library 220 may provide a screen saver that presents useful information in an unobtrusive video frame. The video

frame may present one or more slowly moving images such as graphics that enhance the displayed active image. Alternatively, the video frame may present a non-black background with superimposed auxiliary information, such as, subtitles, program guides, graphics, or the status of other programs. In another embodiment, the screen saver library 220 may provide a screen saver that presents a subdued colored pattern that changes color very slowly in a manner designed to not distract the viewer (fig. 2, col. 7, lines 11-23).
